Latte Art Factory error codes

Code	Message	Comments	Solution
1001	Couldn't start cleaning process.		Try again or reboot
1002	Couldn't stop cleaning process.		Try again or reboot
1003	Flush failed.		Try again or reboot
1004	Abort failed.		Try again or reboot
1005	Invalid recipe data.	Internal message, does not show on the screen	
1006	Preheat failed.	Not in use for now	
1007	Milk is empty.	Triggered by pump current. Parameter IDs 6 and 43	1) Refill milk; 2) Milk container not plugged properly; 3) Air setting too high = reduce Air on Milk Airflow page; 4) Restrictor in the Heating elemen outlet is blocked 5) flow of milk is obstructed somewhere (for example milk valve not opening) 6) Pump calibration was done with milk container pluged in 7) Milk is spoiled 8) Increase Prop valve delay in Milk module settings
1008	Couldn't abort calibration.		Try again or reboot
1009	Cleaning heating timeout.	Cleaning solution temperature cannot be reached. Parameter ID 22	Check heating element
1010	No cleaning Pill.	Expected conductivity of cleaning solution was not reached. Paramter ID 23	Make sure the recommended cleaning pills are used (2 tablets per cleaning). Check if parameter Water fill time container (ID 21) is at 500

1011	Water is not available.	Is triggered during cleaning when the flowmeter readout drops below 1ml/sec (parameter ID 32)	1) Replug cleaning adapter and make sure it is pushed all the way in (pictures in cleaning manual)
			2) Inspect water flowrate in Direct Control by activating Water inlet valve. It should be in the range of 4-7. If lower or 0:
			  A) Check if water is coming to the LAF
			  B) Check if water valve is opening;
			  C) Inspect if the heating element outlet is not blocked;
			  D) Clean water valves

1012	Calibration failed.		Try again or reboot
1013	Water filter expired.	Reminds to replace the water filter. Does not affect machine operation	Replace the filter. In Technician - Tech.Settings - Water filter set new filter lifecycle (both days and liters) and press reset button (Water filter has been replaced..). It is important to input amount of liters, 0 will trigger the message right away again
1014	Send Parameter failed.	Not in use for now	
1015	Cleaning required.	Cleaning is triggered by: 1) 3 days of inactivity; 2) 24 hours after 1st drink dispensed; 3) Cleaning schedule at Menu - Service; 4) 1 hour of total dispense time (parameter ID 46)	Do the cleaning cycle
1016	Flush required.		Press Flush button on the mainscreen
1017	Database error.		Reboot
1018	Milk module is busy.		Wait for LAF to finish previous cycle
1019	Configuration mode is active.	Internal message, does not show on the screen	
1020	Start Idle calibration failed.		Try again or reboot
1021	Idle current calibration failed		Try again or reboot
1022	No CAN connection.		Check CAN connection cables
